A 1-minute recording
of every event

3- or 7-day recording
A multi-day recording
in periods of absence

Live streaming
Online real-time
monitoring

A feeling of real security with our new cameras

With the new cameras and with the MyJABLOTRON application you have full control of your home without the necessity of continuously checking your phone. This is because the system automatically produces a 1-minute recording of every event from the JABLOTRON 100 alarm. The data is sent directly to the Cloud, where it is safely stored and backed up.

DOME IP camera

6,95 €

Are you often away from home?

You can easily check last week's events using the 7-day recording service, not missing a single thing.

7-day video recording

For maximum security

Connect your security system with cameras to the Alarm Receiving Centre and leave any worries to its operators.
