

Video verification IP cameras

The new cameras are part of the JABLOTRON 100 alarm. This allows them to respond to the status of the system and to provide the user with immediate information.

Quick installation within a few minutes

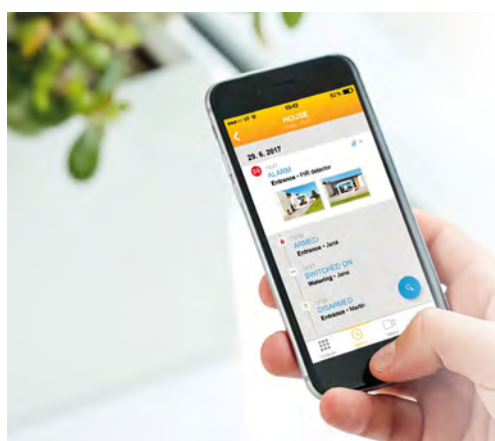

Easy installation

You can install the camera very easily in a few steps. Before fixing the camera to the wall, scan its code. The system will set the camera automatically and all you need to do is to assign a name to it in the MyCOMPANY application.

Technical specifications

Camera	No. of pixels	Resolution	Viewing angle	IR lighting reach	Sensor	Power supply	Communication
